

## We've Already Done the Work of Finding Companies that Use Salesforce.com For You!

(and it wasn't easy.)

Do you offer a product or service to companies that use Salesforce.com?

Would a targeted, researched, verified, and ever-expanding (we add 20+ names a day) list of companies that use Salesforce.com speed up your sales and marketing efforts?

What would a list of 5000 companies and over 40,000 contact names of recently verified companies that use Salesforce.com mean to you, especially if you could have it and your competitor could not? *(we are only selling 40 exclusive licenses, and if you buy 1 first you can give us 1 competitor name that we will NOT sell to until the 40 licenses are gone.)*

What if you could get new company and contact names and updates on Salesforce.com users every quarter for an entire year, and first rights on each year thereafter?

Introducing the **'Salesforce User List Subscription'**, a brand new annual subscription service by Incho, a leading online research organization with headquarters in Chicago, Illinois, USA, and call center and research staff offices in Makati City, Philippines.

"Incho has been a great research partner in the past, so when they told us they had gathered a list from the public domain of companies that use Salesforce, we leapt at the opportunity, and it's been a gold mine!"

**Dave Elkington, CEO**  
**InsideSales.com**

*(An AppExchange Partner and makers of PowerDialer™ for Salesforce.com)*

We can also provide your company with:

- Specialized list research services
- Data entry services
- Telephone-based research
- Internet research and information gathering
- Order entry from different sources
- Faxed information transcription
- Data entry / clean-up into a variety of platforms

Please feel free to contact us at any time
